PLASTIC SURGERY
TRAINEES ASSOCIATION **PLASTA**

Fellowship Title / Hospital: Senior Breast Microsurgical Fellow , University Hospital South Manchester (Wythenshawe)
Fellowship Director:
Consultants Attached to Fellowship/Department: Mr J Duncan Mr S Wilson Miss S O’Ceallaigh Miss L Highton
Aims / Subspecialist Areas of Interest: Microsurgical breast reconstruction
Length of Fellowship: 12 months
Career Grade of Applicants: post-FRCS
Extra Information (on call commitments, research opportunities etc): There are 4 consultants (with further appointments imminent) in the unit, specialising in microsurgical breast reconstruction with approximately 160 free flap cases per year. The majority of the post will encompass breast microsurgical procedures with the breast team consultants but there may be some scope to become involved in other microsurgical cases (i.e. lower limb). Duties include breast reconstruction theatre sessions and clinics and involvement in teaching and mentoring the specialty registrar grade. Involvement in research and audit is expected with lots of opportunities.
Start of Fellowship Dates: ASAP
How to apply for the fellowship: via nhs jobs website
Closing Date for Application:
Interview Date:
Contact Person: Ellis Hayes
Email: Ellis.hayes@mft.nhs.uk
Application Address: University Hospital South Manchester, Wythenshawe, Manchester

Tel / Fax:

Website: <https://mft.nhs.uk/wythenshawe/services/burns-and-plastics/>

Additional Information(Review of the fellowship/Special requirements if overseas/etc):

This is an excellent opportunity to learn from experienced breast reconstruction plastic surgeons who provide high quality training opportunities. With expansion of the service, there are at least 3 microsurgical breast reconstructions performed each week with this number increasing. The service is well supported by specialist trained nursing staff and the unit has a very close working relationship with the Nightingale Centre, one of England's largest breast screening units. There is also the opportunity to become involved in lower limb microsurgical reconstruction as we also have a well established orthoplastic service.

Manchester is a great city to live in and UHSM is easily commutable from city centre or south Manchester suburbs. The hospital is close to the motorway and Manchester airport with excellent transport links.
